Web Development Certificate 2013

+ projects

Rounderwear

Rounderwear is a multi-lingual designer underwear site. Rounderwear is built on top of a Magento e-commerce platform. Using PHP, CSS 3, HTML 5 and jQuery, I overhauled the front and backend to add new features and a fresh look for desktop and mobile. <http://rounderwear.com/>

Vertigo USA

Vertigo USA was built on a 3dcart e-commerce platform with an integrated wordpress blog. Using PHP, HTML 5, CSS 3, jQuery, and AJAX, I added a single page shopping experience with a updated look. <http://www.vertigousa.com/>

The Hundreds

I handcrafted responsive HTML email templates to keep customers informed about featured stories and new products. <http://thehundreds.com/>

Kryptonics Wheels

Created C-name records to redirect the name servers to Squarespace. <http://www.kryptonics.com/>

Enve Composites

I created a style guide of common elements coupled with design guidelines. To ensure a seamless transition, I set up 301 redirects for outdated links to their proper pages. <http://enve.com/>

Beer Me!

Beer me is a mobile app built on a Rails API with an AngularJS front end. I worked on the Backend team scraping data and storing it in our database. https://play.google.com/store/apps/details?id=com.beer_me
